SpeakUp Web Platform

Description:

Introducing SpeakUp, the web platform that provides a safe and supportive environment for people to share their problems and connect with others who can relate to their experiences. SpeakUp is a social media platform that is designed to help individuals speak out about their problems, worries, and concerns in their states and city.

The platform is built on the idea of sharing problems in their areas, and its user-friendly interface makes it easy for people to communicate their thoughts and feelings about the problems that they are facing in their city. Users can post text, and photos.

One of the most significant benefits of SpeakUp is that it allows people to speak their minds without fear of judgment. Users can choose to remain anonymous if they wish. Or they can even write their name in the post itself. The platform is anonymous.
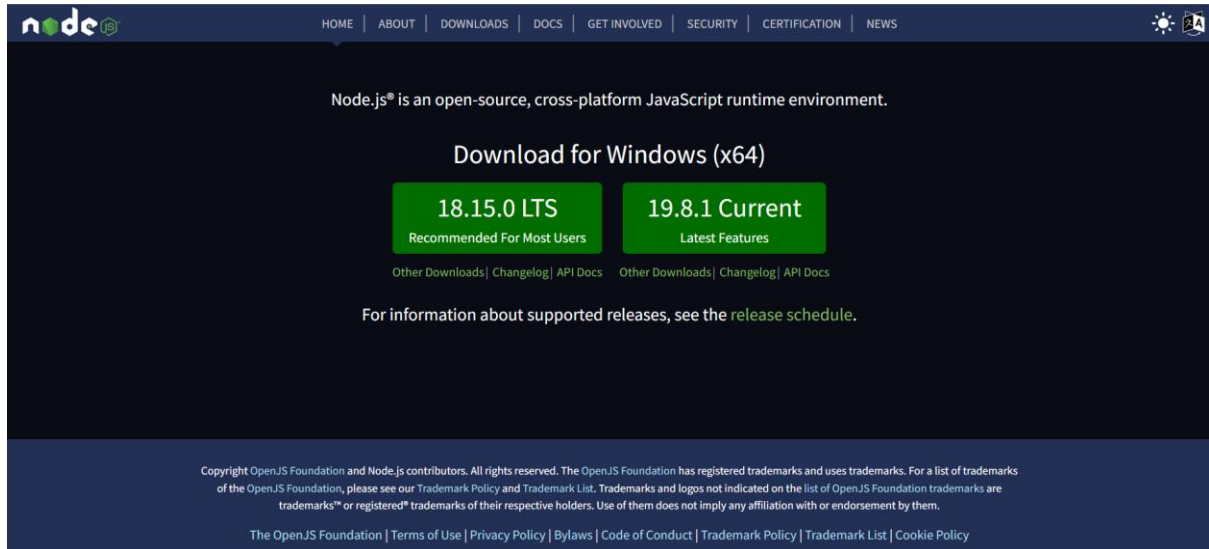

System Requirement:

**Processor:** Intel Core i3 and higher / AMD Ryzen 3
